**Main Building**
Smoking is not allowed within twenty feet of the main entrance and smoking is prohibited within the internal open spaces (courtyards between the core and north wing and the core and south wing.)

**East Building**
Smoking within twenty feet of the perimeter of the building is prohibited. A smoking shelter is available for use close to the main entrance. This shelter provides a place protected from the elements and therefore is an alternative for individuals who previously smoked under the canopy at the main entrance to the building or outside at the two entrances at the other end of the building.

**At the Downtown Center**
No smoking is allowed within twenty feet of the rear entrance.
