The primary responsibility of the ADCE is to expand and enhance community partnerships that directly impact enrollment, retention, reputation and support services for the college. I am also responsible for community education, and much of this is focused on older adults. This fall, I will be working to launch a podcast focused on intergenerational relationships and strengthening our Cyber Seniors program which allows youth to train older adults on navigating technology. This empowers older adults to connect with loved ones, schedule doctor’s appointments on line, safely shop on line and more. If you are comfortable with technology and enjoy working with older adults, this is a great opportunity for you. It will also allow you to engage in tasks that enhance your resume.

If you are looking at entering a ‘helping profession’ or something in the field of technology, this position would be wonderful for both your resume and experience.

The following skills will be important:

- Strong social skills
- Technology proficiency
- Enjoys working with young people and older adults
- Skilled in follow through and detail work
